Worldwide Investment Fund Assets and Flows Trends in the Second Quarter 2004

Brussels, November 9, 2004. Investment fund¹ assets worldwide were at €1.85 trillion at the end of the second quarter, edging down 0.5 percent compared with the end of the first quarter of 2004, according to the information compiled by FEFSI and the Investment Company Institute on behalf of the International Investment Funds Association, an organization of national mutual fund associations. The collection for the fourth quarter includes statistics from 40 countries, now including Slovakia.

Over the second quarter of 2004, stock market returns were mixed across nations, with about half of the reporting countries experiencing negative stock price returns. Net cash flow to all funds worldwide decreased from €195 billion in the first quarter of 2004 to €5 billion in the second quarter, pulled down by lower inflows in equity and balanced funds and outflows from bond and money market funds.

Worldwide Investment Fund Assets²
(Trillions of euros, end of quarter)

¹ "Investment fund" is used in this statistical release in the sense of publicly offered open-end fund investing in transferable securities and money market funds, which refers to "mutual fund" in the U.S. and "UCITS" in FEFSI's statistics on the European investment fund industry.

² Excluding funds-of-funds assets.

Measured in local currency, the American mutual fund market recorded a fall of 0.3 percent, whereas UCITS assets increased by 0.8 percent in Europe.³ It is also worthwhile noting the sharp increase in the market in Australia, in large part as a result of a 50 percent increase in funds-of-funds assets.

(3) 2004:Q2 compared to 2004:Q1, using the euro as the local currency for Europe.

³ In this release, to ensure consistency with FEFSI European statistics, Europe is defined as regrouping Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, Poland, Portugal, Slovakia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

In the second quarter of 2004, total assets of investment funds worldwide were down slightly as modest increases in equity and balanced fund assets could not offset declines in bond and money market fund assets. Worldwide assets of equity funds increased 1.9 percent during the second quarter. Stock price indexes rose in about half of the reporting countries in the second quarter and net cash flow into equity funds registered a sizable €63 billion in the quarter (although smaller than the first quarter's inflow of €114 billion). All regions reported net inflows into equity funds in the second quarter, with €32 billion occurring in the United States and €20 billion in Europe. Assets of balanced/mixed funds were about unchanged in the second quarter of 2004, with reported small net inflows of €5 billion.

(1) For Austria, Czech Republic, Denmark, Finland, France, Germany, Greece, Italy, Liechtenstein, Luxembourg, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and the UK.

(2) 29 countries reported net sales in 2003:Q1, 30 in the four following quarters, and 31 in 2004:Q2. Net sales are new sales plus reinvested dividends less redemptions plus net exchanges.

⁴ Excluding the Netherlands, whose data are not available at this time for 2004:Q2.

Bond fund assets worldwide fell 2.3 percent in the second quarter of 2004, pulled down in part by a net outflow of €10 billion. In the second quarter of 2004, the United States reported large net outflows from bond funds (€19 billion), which is typical when interest rates are rising. The Asian/Pacific region reported a small net outflow from bond funds, while Europe posted net inflows.

Money market fund assets worldwide fell 1.5 percent in the second quarter of 2004, pulled down by a total net outflow of €52 billion in the quarter. The bulk of the outflow occurred in U.S. money market funds (reporting an outflow of €49 billion), although Europe and the Asia/Pacific region also reported outflows.

At the end of the second quarter of 2004, assets of equity funds represented 44 percent of all worldwide mutual fund assets. The asset share of money market funds was 23 percent, while that of bond funds was 20 percent. Balanced/mixed funds represented 9 percent of the total.

Composition of Worldwide Investment Fund Assets, 2004:Q2
(Percent of total assets, end of quarter)

The number of mutual funds worldwide stood at 54,126 at the end of the second quarter of 2004. By type of fund, 41 percent of the funds were equity funds, 22 percent were bond funds, 21 percent were balanced/mixed funds, and 9 were money market funds.

Composition of Worldwide Investment Funds, 2004:Q2
(Percent of funds, end of quarter)

Looking at the worldwide distribution of investment fund assets, the United States and Europe held the largest share in the world market, 51.4 percent and 32.7 percent, respectively. Australia, Japan, Canada, Hong-Kong and Brazil follow in this ranking. Taking into account non-UCITS assets, the market share of Europe reached 38.2% and that of the U.S. 47.2%.⁴

Worldwide Investment Fund Assets, End 2004:Q2
(Market share, end of quarter)

⁴ Assets of UCITS and non-UCITS funds in Europe at end-June 2004 are provided in Table 6 in annex.
