

Quarterly Statistical Release

September 2006, N° 26

This release and other statistical releases are available on efama's website (www.efama.org)

Trends in the European Investment Fund Industry in the Second Quarter of 2006

and

Results for First Half of 2006

This report was prepared by Bernard Delbecque, Director of Economics and Research

EFAMA
The European Fund and Asset Management Association

Square de Meeûs, 18 - B-1050 BRUXELLES - Tel. 32-2-513.39.69 Fax: 32-2-513.26.43 - e-mail: info@efama.org

Stay tuned ...

EFAMA Fact Book 2006 - coming out soon!

You want to stay tuned to recent trends in the European investment fund market. Looking for growth perspectives for the industry or details on household ownership of investment funds? Need info on historical data and assets under management of Europe's leading managers? You'll find it all - and much more - in the 2006 EFAMA Fact Book.

The fourth edition of the EFAMA Fact Book will be available as of mid-September 2006.

To order the Fact Book (price: EUR 75.00), please visit www.efama.org or email us at info@efama.org.

Trends in the UCITS Market ¹ Net Sales by Investment Type

Net flows to UCITS fell to EUR 54 billion in the second quarter, from EUR 186 billion in the first quarter. For the most part, this reflected a sharp fall in net inflows in equity and bond funds. Balanced funds were also affected, albeit to a lesser degree. The swing in net sales of equity funds was triggered by the stock market declines observed in May and June. In a number of countries, concerns about inflationary pressures also led many investors to reduce their exposure to bond price risks. Despite the sudden retraction of risk appetite in the second quarter, the outlook remains good for the rest of the year, as the rise in volatility in global financial markets in the spring does not appear to signal an impending downturn or significant risks to the global economic or financial outlook.

Notwithstanding the sharp slowdown in net inflows in the spring, on a year-to-date basis, UCITS still captured EUR 240 billion in net flows, EUR 64 billion more than in the first half of 2005. This outcome was driven by net inflows into equity and balanced funds, which reached EUR 159 billion year-to-date, compared with EUR 60 billion in the first half of 2005. On the other hand, bond funds gathered in the first months of 2006 EUR 60 billion less than in the first half of 2005.

^{1 &}quot;UCITS" is used in this note in the sense of publicly offered open-end funds investing in transferable securities and money market funds.

Trends in the UCITS Market Net Sales by Country of Domiciliation

Luxembourg-domiciled funds attracted 87 percent of total net inflows to UCITS in the second quarter. The importance of this market share reflects the continuing rise of Luxembourg for cross-border fund distribution and "round-trip" funds. As documented in the forthcoming EFAMA Fact Book 2006, a significant proportion of net sales of Luxembourg-domiciled funds corresponds to net sales of Luxembourg-based cross-border funds promoted by national and foreign fund managers in Germany, Italy and Switzerland.

The unusually high market share taken by Luxembourg also mirrored the fact that UCITS recorded outflows in nine European countries, with the net redemption activity concentrating mostly in the equity and bond fund markets. Having said this, despite the rise in volatility in the stock markets, equity and balanced funds continued to gather new money in many countries, with French-domiciled funds collecting the highest inflows in the equity fund market in the second quarter (EUR 11.5 billion) and Luxembourg-domiciled funds in the bond fund market (EUR 7.6 billion). Italy, on the other hand, continued to experience large outflows (EUR 6 billion in the equity market and EUR 9 billion in the bond market). In the equity market, outflows were also relatively large compared to recent trends in Austria, Germany, Norway, Spain and Sweden. The same was true in the bond fund market for Austria and Switzerland.

Balanced funds continued to gather robust inflows, highlighting the importance taken by diversification in investor assessment in periods of volatile financial markets. Money market funds also continued to attract new money, reflecting in part the appeal of "enhanced" or "leveraged" money funds offering absolute returns. Luxembourg-based "other" UCITS, in particular funds of funds, also recorded strong inflows.

For the first half of 2006, the top 5 countries in terms of net sales were Luxembourg, France, the United Kingdom, Switzerland and Finland, with net inflows significantly higher than in the same period of last year.

Trends in the UCITS Market Net Assets by Investment Type

Total net assets of UCITS fell by 1.3 percent in the second quarter to reach EUR 5,485 billion at end June 2006, compared to EUR 5,559 billion at end March 2006. The decline in UCITS assets under management reflected a 4.8 percent fall in equity fund assets and a 2 percent fall in bond fund assets. All other fund categories recorded an increase in assets in the second quarter.

Since the end of 2005, total assets in UCITS rose by 5.8 percent, with balanced funds, funds of funds and other UCITS recording double-digit asset growth.

Trends in the UCITS Market Net Assets by Country of Domiciliation

Looking at the development in the major markets, six countries recorded positive UCITS asset growth in the second quarter: Poland (2.4%), Ireland (2.2%), Finland (1.6%), Liechtenstein (0.5%), the United Kingdom (0.9%) and France (0.3%). Asset growth turned negative in all other countries, with asset losses exceeding 5% in Turkey and Hungary, reflecting currency depreciation, as well as in Greece, Italy and Slovakia. As indicated above, the fall in asset growth reflected a fall in investor risk appetite, which was a normal adjustment to the perceived rising risks in global financial markets in late spring.

For the first half of 2006, the top 5 countries in terms of UCITS growth were Poland (17.8%), Finland (14.8%), Sweden (13.6%), Switzerland (12.8%) and the United Kingdom (9.8%). Asset growth was also above European average in the Czech Republic (7.9%). Reflecting the developments in the second quarter, total UCITS assets at end June fell below their end 2005 level in Germany, Greece, Hungary, Italy, Netherlands, Portugal, Slovakia and Turkey.

Trends in the Non-UCITS Market ² Net Sales and Assets by Investment Type

With total assets reaching EUR 1,459 billion at end June, non-UCITS remained nearly constant in the second quarter.

Despite the increase in risk aversion in global financial markets, net flows to special funds reserved for institutional investors collected a hefty EUR 15 billion in new investment. This was significantly less in the first quarter, but more than the average amount of new money collected by special funds in 2004-2005 (EUR 11 billion). The same observation is valid for German "Spezialfonds", which collected EUR 12 billion in the second quarter, compared to an average of EUR 7 billion in 20004-2005.

Since end 2005, total assets of non-UCITS grew by 4 percent. Asset growth in the first half of 2006 has been driven by robust growth of assets managed in employees' saving funds in France, funds of hedge funds in Italy, and other non-UCITS in Luxembourg and Switzerland.

² The "Non-UCITS" part of the investment fund market groups funds that are regulated in accordance with specific national requirements. The non-UCITS market is dominated by five types of products: the German "Spezialfonds" reserved for institutional investors, the British closed-ended investment trusts, the property funds, the French open-ended employees saving funds and more recently "other" Luxembourg non-UCITS funds.

Trends in the European Investment Fund Industry Net Assets by Country of Domiciliation

The combined assets of the investment fund market in Europe, i.e. the market for UCITS and non-UCITS, fell by 1% in the second quarter to reach the EUR 6,944 billion at end June 2006.

Three countries (Luxembourg, France and Germany) had a market share of 57.5% at end June. The United Kingdom, Ireland and Italy followed in this ranking.

With EUR 5,485 billion invested in UCITS, this segment of the business accounted for 79.0% of the fund market at end June.
